Anti-Carjack Security System

The Anti-Carjack system protects car owners by allowing carjackers to leave the crime scene. The system gradually triggers the siren and parking lights then cuts the engine starter, forcing the carjacker to abandon the vehicle. Built-in patented 2-stage electromagnetic shock sensor, and more.

FEATURES:

- **Miniature Alarm Brain (3" x 2¾" x 1¼")**
 - Patented EasyTest™ for quick and quiet test of alarm.
 - Patented Fail-Safe arming verifies the alarm will arm passively.
 - Patented Level-II Security™ assures continual protection.
- **6-Function LED**
 - LED indicates alarm arming (in passive mode), armed, and disarmed, plus valet mode.
 - Indicates RF reception for troubleshooting.
 - Indicates anti-carjack status.
- **Multi-Function Push-Button**
 - Valet (panic can still be activated).
 - Emergency Disarm.
 - One-time override of passive arming.
 - Feature programming and code learning.
 - Disable anti-carjack mode.
- **Starter Disable Output**
 - Disables starter once alarm is armed.
 - Triggers alarm if thieves attempt to start car.
- **Door Lock Outputs**
 - Lock/unlock doors, even while driving or in valet.
 - Ignition-controlled door lock/unlock (programmable).
- **On-Board Dual-Stage Shock Sensor (Patented)**
 - Adjustable trigger and pre-trigger.
 - Chirps with light tap; triggers with strong rap.
 - Revolutionary new design.
- **128dB Multi-Tone Siren**
 - Multi-tone siren, but no "toy" sounds.
 - Chirps indicate armed, disarmed, pre-intrusion, zone bypass & sensor bypass.
 - During anti-carjack, siren chirps or sounds to indicate status.
- **Flashing Parking Lights (Built-in relay)**
 - Flash for armed, disarmed, pre-intrusion, zone bypass, sensor bypass, trigger and tamper.
 - Flash to indicate alarm is in hijack mode.
 - Pos./neg. output, single- or dual-circuit.

- **2 Two-Button, Two-Channel Transmitters**
 - 200 feet range, 68 billion possible codes.
 - Code learning of up to 4 remotes.
 - Codes stored in EEPROM.
 - 2nd channel RF output.
 - Chirp delete, zone bypass, sensor bypass, and panic via remote.
 - RF CodeAway™ deletes all codes during code learning to prevent use of lost or stolen remotes.
- **Instant Triggering**
 - 6 inputs trigger alarm when trouble occurs.
- **Multiple Programming Functions**
 - Active/Passive Arming.
 - Chirp/No Chirp, and more.
- **Programmable Anti-Carjack**
 - Simple-to-use anti-carjack function goes through a series of steps involving LED, siren, and parking lights once anti-carjack is activated.

The AMAX policy is one of continual development and improvement. For that reason, AMAX reserves the right to change specifications without notice. AMAX is not responsible for misprints.
