

# AMAX

## 3300, 3400K, 3500K

Features patented SafeCode™ code-hopping technology, Anti-Carjack protection, and SecurCode™ security. Offers 2nd & 3rd channel outputs, power door lock/unlock relays or outputs, flashing light relay, immobilization relays or output, and domelight supervision.

AMAX 3400K shown

### 3400K — ALL THE FEATURES OF 3300, PLUS:

- 2-point immobilization
- On-board relays to disable starter, ignition, and/or fuel-pump (replaces starter disable O/P).

### 3500K — ALL THE FEATURES OF 3400K, PLUS:

- On-board door lock/unlock relays.
- Pager output.

### INCLUDES:

- Two 3-button transmitters
- Patented dual-stage shock sensor with independent dual adjustments
- 3-tone, 128dB siren, no "toy" sounds
- Multifunction LED, shows arming, armed, disarmed, Anti-Carjack, valet, All-Time Starter Disable, RF reception and zone-trigger history
- SecurSwitch™ push-button for safe transmitter code learning & emergency disarm
- 2 heavy-duty pin switches with durable nylon-fiberglass shafts

### PROGRAMMABILITY:

- Active or passive arming
- Chirp or silent arm/disarm
- 0.4- / 6.4-sec. door lock/unlock output
- Auto or active door lock (passive mode)
- Permanent disarm / auto rearm
- Whispering Chirp™ or regular chirp
- Ignition lock/unlock ON/OFF
- All-Time Starter Disable ON/OFF
- Anti-Carjack ON/OFF
- Valet ON/OFF
- Comfort mode ON/OFF

## SECURITY

- Patented RF SafeCode™ anti-codegrabbing technology
- Anti-Carjack system  
In a carjack situation, allows the carjacker to drive away before triggering siren and parking lights and disabling the engine's starter.
- Patented SecurSwitch™ technology  
Protects the alarm with a secret code (user-programmable) for code learning of new transmitters and for emergency disarm.
- CodeAway™  
During code learning, deletes codes of all remotes to prevent use of lost or stolen remotes.
- SureSense Trigger™  
Temporarily bypass sensors that trigger repeatedly.
- Starter disable output with starter sensing
- Patented dual-stage electromagnetic shock sensor with pre-intrusion alert
- 5 instant-triggering inputs  
(-) doors, (+) doors, (-) hood/trunk, (-) shock sensor, and starter sensing.
- All-black wires (optional)

## CONVENIENCE

- Two 3-button transmitters:
  - Arm/disarm up to 200 feet (60 meters).
  - 18 quintillion (18 x 10<sup>19</sup>) possible codes.
  - RF anti-scan protection.
  - Code learning of up to 5 transmitters.
  - Transmitter codes stored in EEPROM.
  - 2nd & 3rd channel outputs. (3rd ch. programmable to bypass sensors.)
  - Operate panic, silent arm/disarm, zone and sensor bypass via remote.
  - Second car operation.
- On-board 40A flashing light relay:
  - Flashes to indicate alarm armed, disarmed, zone bypassed or triggered.
  - Flashes for car locator without disarming.
  - Flashes seven times to indicate prior break-in (tamper indicator).
  - Dual circuit, positive or negative output.
  - Dual Power Protection (D.P.P.™) – Back up power source for alarm.
- Power door lock/unlock outputs:
  - Anytime operation, even in valet.
  - Outputs flip-flop between pos. and neg.
  - Programmable active or automatic locking under passive arming, ignition controlled, 0.4/6.4 sec. output.
  - Comfort mode 16/25 sec. programmable.
- Domelight supervision output
- Patented features:
  - Fail-Safe Arming
  - EasyTest™
  - 3-Step Disarm & Automatic Rearm
  - Level-II Security™
  - On-Guard Disarm™

### OPTIONAL SECURITY HOUSING

Clamp onto alarm brain to prevent unplugging of wires
